2. Presentation

Project Management, also known as Project Management is the application of knowledge, skills, tools and techniques with the aim of helping individuals, public and private groups and organizations to carry out a business transformation project. Project management consists of applying knowledge, skills, tools and techniques to project activities to meet project requirements. For this, throughout the course, systems and processes are presented, grouped by areas of knowledge, which are considered universally accepted and recognized as the best within project management.

3. Leaning outcome of the degree

- RATI The graduate will be able to recognize the tasks of the different functional areas within a company or organization, taking into account previous theoretical learning about business structures.
- RAT4 The student will describe the techniques of management in the development of business organizations by means of different written tests.
- RAT5 The graduate will describe the characteristics of the institutions and procedures of the Spanish and European legal system and their impact on the business environment, by means of a written or oral test.
- RAT6 The graduate will be able to understand the different data analysis techniques used to assess the feasibility of a business project.
- RAT7 The student, after completing the Degree, will be able to identify the HR principles and practices of organizations through real-world case study learning
- RAT8 The graduate will be able to provide a detailed description of the principles of occupational risk assessment as well as the action plans required to implement them in a company.
- RAT9 The student will be able to provide clear and precise explanations of any knowledge/information, both orally and in writing, in Catalan, Spanish and a third language, particularly English.
- RATIO The student will be able to apply digital technologies (at the right time) in his/her field of expertise.
- RATII After completing the Degree, the student will be able to apply the teamwork techniques in an autonomous way.
- RAT12 The graduate will be able to develop both traditional and digital marketing and promotional projects in a business environment.
- RAT13 The graduate will be able to analyze the economic operations of companies, which have been carried out in the financial markets.
- RATI6 The graduate will be able to understand the economic-financial information of business entities and institutions in relation to their environment.

- RATI7 After completing the degree, the graduate will be able to apply techniques to analyze and solve problems in changing business environments through the implementation of challenges and problem-solving methods.
- RAT18 The student will be able to provide innovative, creative and entrepreneurial solutions in professional situations.
- RAT19 The student will be able to evaluate the sustainability and social impact of the proposals presented, with ethical, environmental and professional responsibility.
- RAT20 The student will be able to apply the gender perspective in the professional tasks.
- RAT21 The graduate will be able to verify the economic-financial information of business organizations and institutions with regard to their environment, by analyzing the companies' profit and loss accounts.
- RAT23 The graduate will be able to actively propose a plan for the implementation and support of information and communication systems for the digital transformation of the organization, according to a project based on a real business case.
- RAT24 After completing the degree, the student will be able to design projects for IT services and systems in all business fields.
- RAT25 The graduate will be able to prioritize the operational tasks of the different functional areas of a company or organization.

4. Learning outcomes of the subejct

- RAM1 The student will be able to interpret clearly and consistently the most relevant aspects in the business environment in a business project.
- RAM3 The student will be able to accurately devise actions to improve the results of a business from the analysis of deviations from the objectives set.
- RAM6 The student will be able to correctly analyze the situation of the company from the interpretation of the information presented in the economic-financial statements.

5. Contents

6. Methodology

Learning outcomes developed	Teaching methodology	Training activities
	Master class	Teacher's presentations
	Instructional sessions	Student's presentations
Knowledge	Tutoring	Meetings for the resolution of doubts
	Learning based on readings	Reading and analysis of documents
	Learning based on projects	Problem solving
Skill	Learning based on audio-visual	Audiovisual analysis
	Case-based learning	Search and processing of information. Problem solving
Competence	Project-based work	Reporting Submissions of reports or papers

7. Evaluación

Evaluation system	Weight
Continuous evaluation: exercises, problems, reporting, papers, case studies	40 %
Mid-term exam	20 %
Final exam	40 %

When computing the final grade, the on-going activities (participation, in-class quizzes, seminar cases and group projects, midterm exam) will be weighted only if the final exam grade is equal to or greater than 4.0. Therefore, to obtain a passing course grade, the final

exam grade must be equal to or greater than 4.0. If the final exam grade is less than 4.0, the final exam grade becomes the final course grade, irrespective of the other grades. Students must take the final exam if they want to receive a quantitative course evaluation. Students who do not sit the final exam will receive a "No Show" overall course grade.

"The maximum grade that students may obtain on the revaluation tests [...] shall be 5,0. In addition, "the grade of the revaluation tests will, in any case, constitute the final grade of the subject". Thus, only those students who having completed the partial exam, the final exam and have completed 100% of the activities of continuous assessment of the subject, are suspended (final grade of the subject less than 5) will be entitled to the exam."

<u>Single Evaluation</u>: The single assessment consists of a single examination equivalent to 100% of the grade of the subject. The exam, and therefore the subject, is passed with a grade of 5 out of 10 in this final test.

To benefit from the single assessment, it is necessary to send the teacher a written request during the first 15 working days of the course.
